

Courant
FIRE & RESCUE

**FASTER
BAG**

DESCRIPTION

New Faster guide line bag is more compact and brings rope deviation guides within hand's reach. It does not hinder the rescuer's movements thanks to its different carrying modes: Thigh, belt or shoulder strap (optional). Bag-held guide line keeps user's hands free while working. Guide line can be removed by rescuer without opening the bag. Fire retardant treatment. Can withstand temperatures of up to 220°C.

TECHNICAL SPECIFICATIONS

- Compact bag for 50m and 60m guide lines
- Carabiner fitted guide line
- Front and thigh carrying
- Optional shoulder strap carrying
- Carrying Including 1 to 6 deviation rope guides
- Compartment for passing cards
